

CleanDelay User Manual

AudioForge CleanDelay v1.0.0

Stereo delay with ping-pong mode and tempo sync

Overview

CleanDelay provides crystal-clear delay effects with:

- **Stereo delay:** Independent L/R delay times
- **Ping-pong mode:** Bouncing echoes between L/R channels
- **Tempo sync:** Lock to DAW tempo (1/16 to 2 bars)
- **Feedback control:** 0-95% (infinite repeats possible)
- **High-pass filter:** Clean up low-end in feedback path
- **Wet/dry mix:** Blend delayed signal with original

When to Use CleanDelay

- **Rhythmic delays:** Synced to tempo for musical timing
 - **Stereo widening:** Ping-pong creates wide, spacious delays
 - **Slapback echo:** Short delays (40-120ms) for vintage vibe
 - **Dub effects:** High feedback, filtered delays
 - **Vocal depth:** Subtle delays add dimension without mud
-

Quick Start

Basic Tempo-Synced Delay

1. **Load CleanDelay** on a vocal or instrument track
2. **Set Delay Time** to 1/4 note (quarter note)
3. **Set Feedback** to 30-50%
4. **Set Mix** to 20-30% (subtle)
5. Result: **Musical delay in time with song**

Ping-Pong Effect

1. **Enable Ping-Pong mode** (button)
2. **Set Delay Time** to 1/8 note (eighth note)
3. **Set Feedback** to 40-60%
4. **Set Mix** to 30-40%
5. Result: **Bouncing stereo delay**

Parameters

Delay Time

Sync Mode (default):

- **1/32 to 2 bars** (musical divisions)
- Automatically adjusts to DAW tempo changes
- Examples: 1/16, 1/8, 1/4, 1/2, 1 bar

Free Mode (ms):

- **1 ms to 2000 ms** (2 seconds)
- Independent of tempo
- Use for slapback (40-120ms) or special effects

Tip: Click "Sync" button to toggle between Sync and Free modes.

Feedback

Range: 0-95%

Default: 30%

Description:

- **0%:** Single echo (no repeats)
- **30-50%:** Natural decay (3-5 repeats)
- **60-80%:** Long tail (8-12 repeats)
- **90-95%:** Near-infinite repeats (dub-style)

Warning: Values >90% can build up quickly - watch your levels!

Mix (Wet/Dry)

Range: 0-100%

Default: 25%

- **0%:** Dry only (bypass)
 - **25-40%:** Subtle delay (vocals, leads)
 - **50%:** Equal wet/dry (special effects)
 - **100%:** Wet only (send/return use)
-

High-Pass Filter

Range: 20 Hz - 1000 Hz

Default: 200 Hz

Filters low frequencies from feedback path to prevent muddiness.

Settings:

- **20 Hz:** No filtering (full bass in repeats)
 - **200 Hz:** Clean up sub-bass (recommended for most uses)
 - **500 Hz:** Thin repeats (telephone-like effect)
-

Ping-Pong Mode

Off (default): Stereo delay with independent L/R

On: Ping-pong (delays bounce L → R → L → R)

Use ping-pong for:

- Wide, spacious delays
 - Rhythmic effects
 - Creative stereo movement
-

Use Cases

1. Vocal Slapback Delay

Settings:

- Delay Time: 80-120ms (Free mode)
- Feedback: 0-20%
- Mix: 15-25%
- HPF: 300 Hz

Result: Classic rockabilly/50s vocal sound

2. Synth Lead Rhythmic Delay

Settings:

- Delay Time: 1/8 (Sync)
- Feedback: 40%
- Mix: 30%
- Ping-Pong: On

Result: Bouncing, rhythmic delay in time with track

3. Dub/Reggae Delay

Settings:

- Delay Time: 1/4 or 3/16 (Sync)
- Feedback: 70-85%
- Mix: 40-50%
- HPF: 400 Hz

Result: Classic dub echo with filtered repeats

4. Ambient Pad Delay

Settings:

- Delay Time: 1/2 or 1 bar (Sync)
- Feedback: 60%
- Mix: 35%
- Ping-Pong: On
- HPF: 250 Hz

Result: Lush, evolving delay tail

Tips & Techniques

1. Automate Feedback for Swells

Automate Feedback from 30% → 90% for dramatic delay builds (drop sections).

2. Combine with Reverb

Chain: CleanDelay → Reverb

Why: Delays feed into reverb for depth and space

3. Use in Send/Return

Set Mix to 100%, use as send effect for parallel processing.
