

Saturation User Manual

AudioForge Saturation v1.0.0

Multi-mode analog-style saturation (tape, tube, transistor)

Overview

Saturation emulates analog warmth with:

- **3 Saturation Types:** Tape, Tube, Transistor
 - **Drive:** 0-100% (amount of saturation)
 - **Tone:** Tilt EQ (darken or brighten)
 - **Mix:** Parallel saturation blending
-

Quick Start

Tape Warmth

1. **Type:** Tape
2. **Drive:** 30-50%
3. **Tone:** -10% (slightly darker)
4. Result: Vintage tape warmth

Tube Overdrive

1. **Type:** Tube
2. **Drive:** 60-80%

3. **Tone:** 0%
 4. Result: Tube amp-style overdrive
-

Parameters

Saturation Type

Tape: Soft compression + tape-like saturation (warm, smooth)

Tube: Asymmetric tube distortion (rich, creamy)

Transistor: Aggressive transistor clipping (punchy, hard)

Drive

Range: 0-100%

Description: Amount of saturation

- **0-30%:** Subtle warmth
 - **40-60%:** Moderate saturation
 - **70-100%:** Heavy distortion
-

Tone

Range: -100% to +100%

Description: Tilt EQ (darken or brighten)

- **-100%:** Darker, warmer
 - **0%:** Neutral
 - **+100%:** Brighter, edgier
-

Use Cases

1. Master Bus Glue (Tape)

Settings: Tape, Drive 20%, Tone -5%, Mix 100%

Result: Cohesive, analog-sounding mix

2. Guitar Amp Sim (Tube)

Settings: Tube, Drive 70%, Tone +10%, Mix 100%

Result: Overdriven guitar amp

3. Drum Punch (Transistor)

Settings: Transistor, Drive 50%, Tone 0%, Mix 80%

Result: Punchy, aggressive drums

Tips

- **Tape:** Best for subtle warmth (mix bus, vocals)
 - **Tube:** Best for guitars, bass, synths
 - **Transistor:** Best for drums, aggressive elements
 - Use **Tone** to balance brightness after saturation
